

**CPM 220ER****CPM 220D**

Mortar mixers are made up of a stationary barrel and an internal paddle with a rubber strip. The paddle rotates and simultaneously mixes the mortar while scraping the sides of the barrel keeping the adhesive mortar from sticking to its sides. These heavy duty mixers are tough enough to handle a range of jobs including stucco, plaster, epoxy, terrazzo, drywall mud, paint or grout. While they work well for mortar mixtures, they should never be used for cement / concrete mixtures. A much coarser mixture like concrete causes wear on the rubber strips and pieces of rock or gravel can clog the paddle.

Model	CPM 220D	CPM 220ER
Pan Capacity	220L	220L
Mixing Speed	10L/min	10L/min
Transmission Speed	3000rpm	1500rpm
Power	4.1kW/5.5Hp	3kW/4Hp
Power Source	Diesel	Electric Motor
Weight	200kg	200kg
Dimension	1800x1050x1750(mm)
