

## SUPERSHINE PLUS

With semi-rigid support, is recommended with the use of "mono brush machines" to re-polish perfectly and in a short time also very old and worn out floors, getting results comparable to those obtained with the professional Floor Care Machines. They leave a mirror and glide polished surface without " the orange peel effect" which generally leave the competitors diamond abrasive discs on soft support. They remove deep scratches and also restore acid, wine, cola or other products stained-floors.

## SUPERSHINE SOFT

With soft support like "floor pads" is designed for more ordinary use, for glossy recovery and maintenance in large areas with auto-scrubber. Used with normal mono brushes, they can also polish old and worn floors, ensuring an optimal result, not comparable to supershine soft but higher than similiar products because they contain more" diamond". Supershine soft can be used wet or dry system!

## SPONGELUX

Is a special sponge disc, that is able to wash and polish with only one step. Spongelux has special composition which is the ideal solution for standard polishing.

The best solution for Concrete, Terrazzo and Natural stones.

- ▶ Polished concrete, trowelled concrete and concrete overlay (like Ultratop or Pandomo) polishing.
- ▶ Marble, Terrazzo and natural stone restoration and polishing.

Can be used wet on natural stone or dry on concrete and screed. The flexible support and its design allows it to grind, sand and hone the surface fast leaving a homogeneous finish. Elica is the best solution for semi gloss, honed and matt finish on trowelled concrete or screed without exposing the aggregate.

Elica 000	Grit: 60 Diameter: 100,200,240,430
Elica 00	Grit: 120 Diameter: 100,200,240,430
Elica 0	Grit: 220 Diameter: 100,200,240,430
Elica 1	Grit: 400 Diameter: 100,200,240,430
Elica 2	Grit: 800 Diameter: 100,200,240,430
Elica 3	Grit: 1500 Diameter: 100,200,240,430
Elica 4	Grit: 3000 Diameter: 100,200,240,430

**EPC-55100**

EPC-55 edge pro-ceramic specifically designed for grinding and shaping stone and concrete surfaces. The edge pro-ceramic are aggressive cutters at very high speeds and the hardest surfaces.

Size: 5.5inch Grid: 50,100

**EPC-7100**

EPC-7 easy edge ceramic bond edging tool is excellent for removing deep scratches and for blending in the edges with rest of the floor. They can be used on any grinder no need for available speed grinder.

Size: 7inch Grid: 50,100 Max: 6700rpm
